-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 07 January 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### DETAILED ACTION

1. The disclosure is objected to because of the following informalities: proper reference to the reissue parent application should be included in the first paragraph of page 1 of the instant specification.

Appropriate correction is required.

2. Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22, "the lift arm second end" in line 2 and "the lift arm" in the last two lines lack antecedent basis.

3. Claims 1-30 are rejected under 35 U.S.C. 251 as applicant has failed to pay the required maintenance fees on the parent patent. A reissue application can only be granted for the unexpired portion of the term of the original patent. See In re Morgan, 990 F.2d 1230, 26 USPQ2d 1392 (Fed. Cir. 1983).

4. Claims 1-30 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. 6,019,431.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the patent claims encompass all of the limitations of the application claims and thereby anticipate the application claims.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 1 and 24-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Sims '239.

Sims teaches a device which could be used to handle yard waste including a wheeled frame 18 with members as broadly claimed, a dump box (26,44+) movable between loading and dump positions and including walls as broadly claimed, a movable front box wall 92, dump box pivoting means 80, and front wall moving means 98.

Claim 1, the dump box is deemed mounted on a forward end of the frame as broadly claimed – note “forward” per se is a relative term.

Claim 24, the device is configured as broadly claimed.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was

Art Unit: 3612

not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

9. Claim 23 rejected under 35 U.S.C. 103(a) as being unpatentable over Sims '239.

Sims '239 teaches all of the claimed features as discussed above but teaches the device is mounted on a trailer.

Attaching dump assemblies to truck frames is notoriously well known in the art. In order to facilitate transport of the dump assembly of Sims, it would have been obvious to one of ordinary skill in the art to replace the trailer frame with a truck and corresponding truck frame.
